CONTENTS OF VOLUME 46

Acquaye, D. K. and **MacLean, A. J.** Influence of form and mode of nitrogen fertilizer application on the availability of soil and fertilizer potassium, 23.
Potassium potential of some selected soils, 177.
Anderson, C. H. and **Wenhardt, A.** Soil erodibility, iall and spring, 255.
Arnold, R. W. Differentiation of soils having cyclic or recurring horizons, 69.
Bourget, S. J., Finn, B. J., and **Dow, B. K.** Effects of different soil moisture tensions on flax and cereals, 213.
Bourget, S. J. and **Tabi, M. L.** Changements physiques des sols durant le tamisage, 195.
Brach, E. J. and **Mack, A. R.** Tensiometer plate assembly for soil samples, 96.
Carson, J. A. Comparison of methods for amino acid analysis using a desalted hydrolyzate on a Spinco/Beckman analyzer and an untreated hydrolyzate on a Technicon autoanalyzer, 307.
Chiasson, T. C. See MacLean, A. A., 147.
Clark, J. S. The relation between pH and soluble and exchangeable Al in some acid soils, 94.
The distribution constant for exchange of calcium and magnesium in Wyoming bentonite, 271.
Clark, J. S., McKeague, J. A., and **Nichol, W. E.** The use of pH-dependent cation-exchange capacity for characterizing the B horizons of Brunisolic and Podzolic soils, 161.
Clark, J. S. and **Nichol, W. E.** The lime potential – percent base saturation relations of acid surface horizons of mineral and organic soils, 281.
Clayton, J. S. See Shields, J. A., 83.
Coen, G. M., Pawluk, S., and **Odynsky, W.** The origin of bands in sandy soils of the Stony Plain area, 245.
Day, J. H. See McKeague, J. A., 13.
Dekker, A. J. See Evans, E. J., 167, 217.
Desjardins, J. G. See Schnitzer, M., 237.
Dionne, J. L. Comportement differentiel du trèfle Ladino en regard du chaulage sur cinq types de sol du Québec, 261.
Dow, B. K. See Bourget, S. J., 213.
Doyle, J. J. See Saini, G. R., 155.
Dumanski, J. and **St. Arnaud, R. J.** A micropedological study of eluvial soil horizons, 287.
Evans, E. J. and **Dekker, A. J.** Plant uptake of Cs-137 from nine Canadian soils, 167.
Fixation and release of Cs-137 in soils and soil separates, 217.
Farrar, J. L. See Pierpoint, G., 121.
Ferguson, W. S. and **Sowden, F. J.** A comparison of methods of determining nitrogen fractions in soils, 1.
Findlay, W. I. See Fulton, J. M., 75.
Findlay, W. I. and **Fulton, J. M.** An automatic plot shelter for field irrigation experiments, 98.
Finn, B. J. See Bourget, S. J., 213.
Floate, M. J. S. A chemical, physical, and mineralogical study of soils developed on glacial lacustrine clays in north central British Columbia, 227.
Fulton, J. M. Evaporation from bare soil compared with evapotranspiration from a potato crop, 199.
See also Findlay, W. I., 98.
Fulton, J. M. and **Findlay, W. I.** Influence of soil moisture and ambient temperature on nutrient percentage of oat tissue, 75.
Gardner, E. H. See Mackintosh, E. E., 37.
Gupta, R. P. See Staple, W. J., 293.
Hamilton, H. A., Levesque, M., and **Lessard, J. R.** The residual effect of lime on crop yields, pH, and other chemical characteristics of a Grey Wooded soil broken to different depths, 61.
Hanna, W. J. See Levesque, M., 53.
Hinman, W. C. Ammonium fixation in relation to exchangeable K and organic matter content in two Saskatchewan soils, 223.
Hutcheon, W. L. and **Paul, E. A.** Control of the protein content of Thatcher wheat by nitrogen fertilization and moisture stress, 101.
Ivarson, K. C. See Sowden, F. J., 109.
Ivarson, K. C. and **Sowden, F. J.** Effect of freezing on the free amino acids in soil, 115.
Lessard, J. R. See Hamilton, H. A., 61.
Levesque, M. A rapid digestion method for total iron and aluminum in soils, 205.
See also Hamilton, H. A., 61.
Levesque, M. and **Hanna, W. J.** Downward movement of phosphorus and iron in some Podzolic soils of New Jersey, 53.

Levesque, M. and **Schnitzer, M.** Effects of NaOH concentration on the extraction of organic matter and of major inorganic constituents from a soil, 7.
Lowe, L. E. The separation and determination of organic and inorganic sulfate in soil extracts, 92.
Mack, A. R. See Brach, E. J., 96.
Mackintosh, E. E. and **Gardner, E. H.** A mineralogical and chemical study of lower Fraser River alluvial sediments, 37.
MacLean, A. A. See Saini, G. R., 155.
MacLean, A. A. and **Chiasson, T. C.** Differential performance of two barley varieties to varying aluminum concentrations, 147.
MacLean, A. J. See Acquaye, D. K., 23, 177.
Matthews, B. C. See Miljkovic, N. S., 133, 139.
McCurdy, E. V. See Spratt, E. D., 29.
McKeague, J. A. The fixation of Fe^{+2} by ferric oxides in soils, 91.
See also Clark, J. S., 161.
McKeague, J. A. and **Day, J. H.** Dithionite- and oxalate-extractable Fe and Al as aids in differentiating various classes of soils, 13.
Miljkovic, N. S., Matthews, B. C., and **Miller, M. H.** The available boron content of the genetic horizons of some Ontario soils.
I. The relationship between water-soluble boron and other soil properties, 133.
II. The relationship between boron absorption by sunflowers and other soil properties, 139.
Miller, M. H. See Miljkovic, N. S., 133, 139.
Nichol, W. E. See Clark, J. S., 161, 281.
Odynsky, W. See Coen, G. M., 245.
Paul, E. A. See Shields, J. A., 83; Hutcheon, W. L., 101.
Pawluk, S. See Coen, G. M., 245.
Pierpoint, G. and **Farrar, J. L.** The equipotential zone above the water table, 121.
Pohjakas, K. The effect of soluble salts on the compactibility of four Saskatchewan soils, 47.
Saini, G. R., MacLean, A. A., and **Doyle, J. J.** The influence of some physical and chemical properties on soil aggregation and response to VAMA, 155.
Schnitzer, M. See Levesque, M., 7.
Schnitzer, M. and **Desjardins, J. G.** Oxygen-containing functional groups in organic soils and their relation to the degree of humification as determined by solubility in sodium pyrophosphate solution, 237.
Shields, J. A., St. Arnaud, R. J., Paul, E. A., and **Clayton, J. S.** Measurement of soil color, 83.
Smith, J. A. An evaluation of nitrogen soil test methods for Ontario soils, 185.
Sowden, F. J. See Ferguson, W. S., 1; Ivarson, K. C., 115.
Sowden, F. J. and **Ivarson, K. C.** The "free" amino acids of soil, 109.
Spratt, E. D. Fertility of a Chernozemic clay soil after 50 years of cropping with and without forage crops in the rotation, 207.
Spratt, E. D. and **McCurdy, E. V.** The effect of various long-term soil fertility treatments on the phosphorus status of a clay Chernozem, 29.
Staple, W. J. and **Gupta, R. P.** Infiltration into homogeneous and layered columns of aggregated loam, silt loam, and clay soil, 293.
St. Arnaud, R. J. See Shields, J. A., 83; Dumanski, J., 287.
Tabi, M. L. See Bourget, S. J., 195.
Wenhardt, A. See Anderson, C. H., 255.
